

Leveraging extensive expertise in Operating Systems, Networking, and Web Design, I provide a set of versatile skills and practical experience to deliver effective and innovative IT solutions. I'm skilled in configuring, maintaining and troubleshooting **Android, Windows and Linux** OS systems, as well as designing and maintaining reliable **network infrastructures** including TCP/IP protocols, routing, switching, and network security. I also create responsive and user-friendly websites using **HTML, CSS, JavaScript and Laravel framework**. I'm determined to deliver practical and effective solutions that improve system performance, strengthen networks and enhance user experiences.
